

## **A POSITIVE LEARNING PROCESS**

**Learning is not a process limited to college only, nor does it end with the conclusion of one's College career. It is indeed a lifelong process. Our College is oriented to total formation of a student in order to achieve common goals & objectives in Changing world. Entire purpose of education is not to restrict itself of imparting bookish knowledge, but to inculcate humanitarian values. We must realise that College education can be meaningful only when students study with an enquiring mind. They should ask why? And what for? to various facts of knowledge imparted. Unless they study with this inquisitive mind and real learning, desire an indebt and purposive knowledge will not be acquired. The open Environment in a college can be helpful only when there is discussion; relevant queries are raised and satisfied by the faculties. Both the faculties and the students should work towards that goal of education to render it truly professional and useful in career. Lastly the educating the mind without educating the heart is no education at all.**
